### OVERVIEW

The Malaysian economy rebounded strongly in this financial year on the back of the strengthening global economy. This contributed towards improvement in consumer sentiments.

Residential developments, especially landed properties, at prime locations will continue to be in demand. This is assisted by good government stimulus packages, attractive financing packages and improving consumer confidence. During the financial year under review, landed properties recorded sales rate of up to 75% while condominium sales rate remains competitive at 55%.

The Klang Valley currently has a surplus of 13 million square feet of office space. Overall occupancy rate improved to 80% by June 2004 while market rentals generally remained stable. Strategically located office buildings with relatively good occupancy rates due to continuous building enhancement and maintenance programmes have marginally increased their rental rates.

### FINANCIAL HIGHLIGHTS

For the financial year ended 30 June 2004, the Group recorded more than a 100% increase in profit before taxation to RM37.0 million and revenue to RM199.8 million. These were largely due to the profit contribution from the Residential Division and the gain on disposal of a joint venture company.

Gross revenue in this financial year from the Residential Division rose by 94% to RM67 million mainly due to higher sales from 3 KiaPeng, our prestigious service apartment development. The Hotel and Resort Division recorded a 14% growth to RM44.1 million in revenue. This was mainly driven by market confidence and a quick return to the pre-Severe Acute Respiratory Syndrome ("SARS") level. Our Property Investment Division, however, dropped 19% in revenue to RM13.8 million amid the continued situation of office space oversupply.

In the course of this financial year, we saw a steady improvement in our balance sheet. Net tangible assets increased to RM744.9 million as at 30 June 2004, from RM713.8 million in the previous year.

### STRATEGIES AHEAD

Looking ahead, we will continue to focus on property development and property investment, i.e., on our township developments and investment properties that will generate sustainable returns for our shareholders.

#### *Property Development Division*

Emerald Enclave has established its niche as the landmark township in Rawang. Located on freehold land, a mere 1 km from the Rawang Interchange and close to Rawang's town centre, Emerald Enclave presents ready accessibility to Kuala Lumpur ("KL") and Petaling Jaya via the North-South Highway among others.

Its exclusive gated bungalow enclave, the Peridot Precinct, is the idyllic contemporary neighbourhood, with quality home fittings and finishes that present a new level of living comfort and state-of-the-art security features, from perimeter fencing and CCTV system to round-the-clock security patrols and intercom links with guardhouse.

The very encouraging response of earlier phases such as the Amethyst 1 & 2 double-storey terrace houses proves that house buyers are more discerning in selecting not just a choice new home, but a quality neighbourhood environment. The forthcoming release of the Amethyst 3 double-storey terrace houses follows the success of the earlier phases, with the added attraction of an even more generous built-up area.

Astute house buyers will have even more choices to look forward to with the upcoming launches of Emerald Hills. Situated on gently undulating hill ground, the Emerald Hills development is close by Emerald Enclave. Also a gated community with self-contained amenities, the first phase to be launched will comprise double-storey houses, to be followed soon after by the launch of semi-detached and bungalow homes.

Another well-received development is Bukit Rahman Putra, a vibrant township in Sungai Buloh, which presents a wide range of established facilities and amenities such as schools, a shopping mall, shops and a variety of restaurants. It has close accessibility to the North Klang Valley Expressway and the North-South Highway.

The latest development in Bukit Rahman Putra is Ascot Hill 3, the impressive 3-storey semi-detached courtyard homes, designed to make every home a corner lot. Located within an exclusive gated enclave, the neighbourhood features covered utilities and 50 feet wide internal roads that enhance the conducive living environment further.

Pantai Sepang Putra is our integrated township project. West End Bungalow at the Lake District is the latest phase of Pantai Sepang Putra's 7000-acre township. Residents can enjoy clean, fresh air and waterfront living. KL is just a leisurely drive away and KL International Airport is merely a short trip from home. This township provides luxuriant living with sweeping lakeside views from home.

For the discerning few, 3 KiaPeng is an investment of immense potential and a home of unquestionable prestige. It is freehold, with a low-density of only 140 exclusive units. This is one such strategically located development, sited right next to KL City Centre ("KLCC"), to blend the excitement of city living and the tranquillity of the beautifully landscaped KLCC park.

#### *Property Investment Division*

Our Property Investment Division experienced lower revenue compared to the previous financial year. We will continue with our emphasis on stringent maintenance practices as well as ensuring quality tenant profiles for all our buildings. Our office buildings achieved occupancy rate of up to 80% and has improved since the end of this financial year. We will be actively seeking opportunities in the coming year to trade our assets in order to realize capital gains as well as to generate cash flow for investment opportunities.

#### *Hotel and Resort Division*

Our Hotel and Resort Division comprises one resort hotel and two city hotels, located in Port Dickson, Johor Bahru and Hanoi respectively. Occupancy rate has returned to the pre-SARS level and we are seeing increase in hotel reservations and bookings compared to the previous financial year. We will ensure that our hotels continue generating positive cash flow from operations, while at the same time maintaining key operating performance benchmark in terms of productivity, efficiency, occupancy and room rates. We will also place strong emphasis on providing quality service to our guests and ensuring the upkeep of our assets in excellent condition.

## PROSPECTS

Looking ahead, we are optimistic of a positive outlook. Demand for residential properties is expected to strengthen with improving consumer sentiment, increase in private sector investment and

attractive financing packages. Meanwhile, a better economy ahead is expected to improve our office occupancy rate.

With our planned strategies in place, we anticipate our performance to be satisfactory in the coming year.

## CORPORATE DEVELOPMENT

The Company announced on 5 August 2004 that its indirect wholly-owned subsidiary, Bedford Land Sdn. Bhd., had acquired 2 ordinary shares of RM1 each representing the entire equity interest of Prophills Development Sdn. Bhd. for cash consideration of RM2.

On the same date, the Company's indirect wholly-owned subsidiary, Prophills Development Sdn. Bhd. entered into a conditional Sale and Purchase Agreement with its jointly controlled entity, Bedford Damansara Heights Development Sdn. Bhd. ("Bedford Damansara") to acquire an office building known as HP Towers (formerly known as Wisma Semantan) from Bedford Damansara for a cash consideration of RM103,823,400.

## DIVIDEND

## NOTES TO THE FINANCIAL STATEMENTS – 30 June 2004 (cont'd)

### 2. SIGNIFICANT ACCOUNTING POLICIES (cont'd)

#### (b) Basis of Consolidation (cont'd)

##### (i) Subsidiary Companies (cont'd)

- (i) Under the acquisition method of accounting, the results of subsidiary companies acquired or disposed of during the financial year are included from the date of acquisition or up to the date of disposal. At the date of acquisition, the fair values of the subsidiary companies' net assets are determined and these values are reflected in the consolidated financial statements. The difference between the acquisition costs and these fair values is reflected as goodwill or reserve on consolidation as appropriate. Goodwill on consolidation is written off against reserves.
- (ii) Under the merger method of accounting, the results of the subsidiary companies are presented as if the companies had been combined throughout the current and previous financial years. The difference between the cost of acquisition over the nominal value of the share capital and share premium of the subsidiary companies is written off against reserves.

All inter-company transactions and balances and the resulting unrealised profits are eliminated on consolidation and the consolidated financial statements reflect external transactions only. Unrealised losses resulting from inter-company transactions are also eliminated.

The gain or loss on disposal of a subsidiary company is the difference between net disposal proceeds and the Group's share of its net assets together with any exchange differences which were not previously recognised in the consolidated income statement. Minority interest is measured at the minorities' share of the post acquisition fair values of the identifiable assets and liabilities of the acquiree.

##### (ii) Associated Companies

An associated company is an investee company that is not a subsidiary company and in which the Group has a long term equity interest and exercises significant influence over the financial and commercial policies of the investee through Board representation.

Investment in associated company is accounted for in the consolidated financial statements by the equity method of accounting based on the audited or management financial statements of the associated company.

The Group's share of results and reserves of the associated companies acquired or disposed of are included in the consolidated financial statements from the date of acquisition or up to the date of disposal under the equity method.

Unrealised gains on transactions between the Group and its associates are eliminated to the extent of the Group's interests in the associates. Unrealised losses on such transactions are also eliminated to the extent of the Group's interests in the associates.

##### (iii) Joint Ventures

Joint ventures represent contractual arrangements with third parties to undertake construction and development projects.

Investments in joint ventures are accounted for in the consolidated financial statements by the equity method of accounting based on the audited or management financial statements of the joint ventures.

The Group's share of results of joint ventures included in the consolidated financial statements from the date of formation of the joint ventures and up to the date of completion of the projects under the equity method.

Unrealised gains on transactions between the Group and its joint ventures are eliminated to the extent of the Group's interest in the joint ventures. Unrealised losses are eliminated unless the transaction provides evidence of impairment of the assets transferred.

## 2. SIGNIFICANT ACCOUNTING POLICIES (cont'd)

### (c) Property, Plant and Equipment and Depreciation

Property, plant and equipment are stated at cost less accumulated depreciation and impairment losses. The policy of the recognition and measurement of impairment losses is in accordance with Note 2(e).

Freehold land is not depreciated.

Leasehold land and building of the hotel properties are not amortised so as to better reflect their estimated residual values of the hotel properties. Depreciation of other property, plant and equipment is provided for on a straight line basis to write off the cost of each asset over the estimated useful life at the following annual rates:

Buildings other than hotel buildings	2%
Building service plant, equipment and furniture and fittings	5% – 20%
Motor vehicles	20%

Upon disposal of an item of property, plant or equipment, the difference between the net disposal proceeds and the net carrying amount is recognised in the income statement.

### (d) Investments in Subsidiary and Associated Companies and Joint Ventures

The Company's investments in subsidiary and associated companies and joint ventures are stated at cost less impairment losses. The policy for the recognition and measurement of impairment losses is in accordance with Note 2(e).

On disposal of such investments, the difference between net disposal proceeds and their carrying amounts is recognised in the income statement.

### (e) Impairment of Assets

At each balance sheet date, the Group reviews the carrying amounts of its assets to determine whether there is any indication of impairment. If any such indication exists, impairment is measured by comparing the carrying values of the assets with their recoverable amounts. Recoverable amount is the higher of net selling price and value in use, which is measured by reference to discounted future cash flows.

An impairment loss is recognised as an expense in the income immediately, unless the asset is carried at a revalued amount. Any impairment loss of a revalued asset is treated as a revaluation decrease to the extent of any unutilised previously recognised revaluation surplus for the same asset. Reversal of impairment losses recognised in prior years is recorded when the impairment losses recognised for the asset no longer exist or have decreased.

### (f) Foreign Currencies

#### (i) Transactions in foreign currencies

Transactions in foreign currencies are initially recorded in Ringgit Malaysia at rates of exchange ruling at the time of the transaction. At each balance sheet date, foreign currency assets and liabilities are translated into Ringgit Malaysia at exchange rates ruling at that date. All exchange gains and losses are included in the income statement.

## NOTES TO THE FINANCIAL STATEMENTS – 30 June 2004 (cont'd)

### 2. SIGNIFICANT ACCOUNTING POLICIES (cont'd)

#### (f) Foreign Currencies (cont'd)

##### (ii) Translation of foreign currency financial statements

The revenues and expenses of foreign operations are translated into Ringgit Malaysia at average exchange rates applicable throughout the year.

Assets, liabilities and income statement items of foreign subsidiary companies are reported in Ringgit Malaysia at the exchange rates ruling at the balance sheet date. All resulting translation differences are included in the foreign exchange reserve in shareholders' equity.

The principal exchange rates used for every unit of foreign currency ruling at the balance sheet date are as follows:

<b>Foreign currency</b>	<b>2004</b>	<b>2003</b>
	<b>RM</b>	<b>RM</b>
United States Dollar	<b>3.80</b>	3.80
Philippine Peso	<b>0.07</b>	0.07
British Sterling Pound	<b>6.79</b>	6.28
Singapore Dollar	<b>2.21</b>	2.16

#### (g) Investment properties

Investment properties consist of land and buildings held for investment and rental.

Investment properties are treated as long term investments and are stated at cost less impairment losses. The policy for the recognition and measurement of impairment losses is in accordance with Note 2(e).

Upon disposal of an investment property, the difference between the net disposal proceeds and the carrying amount is recognised in the income statement.

#### (h) Development Properties and Land Held for Development

Land and development expenditure are classified as development properties when significant development work has been undertaken and is expected to be completed in the normal operating cycle. Development properties are stated at cost, and where appropriate, include attributable profit less progress payments received and receivable. Cost includes cost of land and development expenditure, interest charges related to the financing of development and an allocation of overhead.

Land held for development consists of land held for future development where no significant development has been undertaken, and is stated at cost and written down value. Costs includes incidental expenditure incurred to put the land in a condition ready for development.

#### (i) Construction Contracts

Where the outcome of a construction contract can be estimated reliably, contract revenue and contract costs are recognised as revenue and expenses respectively by reference to the stage of completion of the contract activity at the balance sheet date. The stage of completion is measured by reference to the proportion of contract costs incurred for work performed to date to the estimated total contract costs.

Where the outcome of a construction contract cannot be estimated reliably, contract revenue is recognised to the extent of contract costs incurred that is probable will be recoverable.

When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognised as an expense immediately.

## 2. SIGNIFICANT ACCOUNTING POLICIES (cont'd)

### (i) Construction Contracts (cont'd)

When costs incurred on construction contracts plus recognised profits (less recognised losses) exceed progress billings, the balance is shown as amount due from customers on contracts. When progress billings exceed costs incurred plus recognised profits (less recognised losses), the balance is shown as amount due to customers on contracts.

### (j) Inventories

#### (i) Property inventories

Property inventories consist of residential and commercial properties. They are stated at the lower of cost and net realisable value. Cost includes the relevant cost of land, development expenditure and related interest cost incurred during the development period.

#### (ii) Others

Inventories are stated at the lower of cost and net realisable value. Cost is determined on the weighted average basis.

### (k) Cash and Cash Equivalents

For the purpose of the cash flow statement, cash and cash equivalents consist of cash in hand, demand deposits and short term, highly liquid investments readily convertible to known amounts of cash and subject to insignificant risk of changes in value, against which the bank overdraft balances, if any, are deducted.

### (l) Provisions for liabilities

Provisions for liabilities are recognised when the Group has a present obligation as a result of a past event, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount can be made. Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate. Where the effect of the time value of money is material, the amount of a provision is the present value of the expenditure expected to be required to settle the obligation.

### (m) Income Tax

Income tax on the profit or loss for the year comprises current and deferred tax. Current tax is the expected amount of income taxes payable in respect of the taxable profit for the year and is measured using the tax rates that have been enacted at the balance sheet date.

Deferred tax is provided for, using the liability method, on temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts in the financial statements. In principle, deferred tax liabilities are recognised for all taxable temporary differences and deferred tax assets are recognised for all deductible temporary differences, unused tax losses and unused tax credits to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, unused tax losses and unused tax credits can be utilised. Deferred tax is not recognised if the temporary difference arises from goodwill or negative goodwill or from the initial recognition of an asset or liability in a transaction which is not a business combination and at the time of the transaction, affects neither accounting profit nor taxable profit.

Deferred tax is measured at the tax rates that are expected to apply in the period when the asset is realised or the liability is settled, based on tax rates that have been enacted or substantively enacted at the balance sheet date. Deferred tax is recognised in the income statement, except when it arises from a transaction which is recognised directly in equity, in which case the deferred tax is also charged or credited directly in equity, or when it arises from a business combination that is an acquisition, in which case the deferred tax is included in the resulting goodwill or negative goodwill.

## NOTES TO THE FINANCIAL STATEMENTS – 30 June 2004 (cont'd)

### 2. SIGNIFICANT ACCOUNTING POLICIES (cont'd)

##### (i) Short term benefits

Wages, salaries, bonuses, annual and sick leave and social security contributions are recognised as an expense in the year in which the associated services are rendered by employees of the Group.

##### (ii) Defined contribution plans

Contributions to defined contribution plans are recognised as an expense in the income statement as incurred.

##### (iii) Defined benefit plans

In previous years, the Group operated a defined contribution scheme for eligible executives which was administered by the Hong Leong Group Executive Retirement Benefit Fund. The benefits payable on retirement were based on a fixed percentage contribution of the salary of the executive as accrued monthly in the executive's nominal account.

The defined benefit plan was dissolved during the year.

##### (iv) Equity compensation benefit

The Hong Leong Properties Berhad Executive Share Options Scheme ("ESOS") allows the Group's employees to acquire ordinary shares of the Company. No compensation cost or obligation is recognised. When the options are exercised, the equity is increased by the amount of the proceeds received.

#### (o) Revenue Recognition

Revenue is recognised when it is probable that the economic benefits associated with the transaction will flow to the enterprise and the amount of the revenue can be measured reliably.

##### (i) Construction contracts

Revenue from construction contracts is accounted for by the stage of completion method as described in Note 2(i).

##### (ii) Development properties

##### (iii) Property inventories

Revenue from sale of property inventories is recognised when the significant risks and rewards of ownership of the property have been passed to the buyer.

##### (iv) Dividend income

Dividend income arising from investments in subsidiary companies, joint ventures, associated company, long term investments and short term investments are recognised when the rights to receive payment are established.

##### (v) Rental income

Revenue from room rental and rental of properties are recognised on the accrual basis unless collectibility is in doubt, in which case, they are recognised on receipt basis.

##### (vi) Interest income

## 2. SIGNIFICANT ACCOUNTING POLICIES (cont'd)

### (p) Financial Instruments

Financial instruments are recognised in the balance sheets when the Group has become a party to the contractual provisions of the instrument.

Financial instruments are classified as liabilities or equity in accordance with the substance of the contractual arrangement. Interest, dividends, gains and losses relating to a financial instrument classified as a liability, are reported as expense or income. Distributions to holders of financial instruments classified as equity are charged directly to equity. Financial instruments are offset when the Group has a legally enforceable right to offset and intends to settle either on a net basis or to realise the asset and settle the liability simultaneously.

#### (i) Short term investments

Short term investments are carried at the lower of cost and market value, determined on an aggregate basis. Cost is determined on the weighted average basis while market value is determined based on quoted market values. Increases or decreases in the carrying amount of marketable securities are recognised in the income statement. On disposal of marketable securities, the difference between net disposal proceeds and the carrying amount is recognised in the income statement.

#### (ii) Receivables

Receivables are recognised and carried at original invoiced amount less an allowance for any irrecoverable amount. An estimation for doubtful debts is made when collection of the full amount is no longer probable. Bad debts are written off when identified.

#### (iii) Payables

Payables are stated at cost which is the fair value of the consideration to be paid in the future for goods and services received.

#### (iv) Interest-Bearing Borrowings

Interest-bearing bank loans and overdrafts are recorded at the amount of proceeds received, net of transaction costs.

Borrowing costs directly attributable to the acquisition and construction of property, plant and equipment, investment properties, land held for development and properties under development are capitalised as part of the cost of those assets, until such time as the assets are ready for their intended use or sale. All other borrowing costs are charged to the income statement as an expense in the period in which they are incurred.

#### (v) Equity Instruments

Ordinary shares are classified as equity. Dividends on ordinary shares are recognised in equity in the period in which they are declared.

The transaction costs of an equity transaction are accounted for as a deduction from equity, net of tax. Equity transaction costs comprise only those incremental external costs directly attributable to the equity transaction which would otherwise have been avoided.

### 33. FINANCIAL INSTRUMENTS (cont'd)

#### (e) Liquidity Risk

The Group and the Company actively manage their operating cash flows and the availability of funding so as to ensure that all repayment and funding needs are met. As part of its overall prudent liquidity management, the Group and the Company maintain sufficient levels of cash to meet their working capital requirements.

#### (f) Foreign Exchange Risk

The Group is not exposed to significant foreign currency risk as the majority of the Group's transactions, assets and liabilities are denominated in Ringgit Malaysia (RM).

#### (g) Fair Values

The carrying amounts of the financial assets and liabilities of the Group as at 30 June 2004 approximate their fair values except as set out below:

	GROUP	
	Carrying Amount RM'000	Fair Value RM'000
<b>Financial Liabilities</b>		
Term Loans	17,000	17,089

The following methods and assumptions are used to estimate the fair values of the following classes of financial instruments:

(i) Cash and Cash Equivalents, Trade and Other Receivables/Payables and Short Term Borrowings

The carrying amounts approximate fair values due to the relatively short term maturity of the financial instruments.

(ii) Quoted share investments

The fair values of quoted shares is determined by reference to stock exchange quoted market bid prices at the close of the business on the balance sheet date.

(iii) Amount due from/to Joint Ventures, Related Parties and Subsidiary Companies

It is not practical to estimate the fair values of amounts due from/to joint ventures, related parties and subsidiary companies due to no fixed repayment terms entered into between the parties.

The nominal/notional amounts and net fair value of financial instruments not recognised in the balance sheets of the Group and of the Company as at the end of the financial year are:

	Group		Company	
	Nominal/ Notional Amount RM'000	Fair Value RM'000	Nominal/ Notional Amount RM'000	Fair Value RM'000
Contingent liabilities	56,566	56,566	17,000	17,089
