On behalf of the Board of Directors, I am pleased to present the Annual Report and Audited Financial Statements of GuocoLand (Malaysia) Berhad Group for the financial year ended 30 June 2005.

Guoman Port Dickson

OVERVIEW

The Malaysian economy grew by 7.1% in 2004 compared with 5.3% in 2003. Although global growth moderated in the second half of 2004, the domestic economy remained resilient with stronger local demand providing the momentum for sustained expansion.

Residential market sentiments for well-planned developments in strategic locations remained strong, spurred by favourable interest rates and attractive financing packages. The young demographic profile of our population and the Government's "*Malaysia, My Second Home*" programme have further created demand for the residential developments. During the financial year under review, landed properties recorded sales rate of up to 71% while condominium sales rate remained competitive at 60%.

The continued growth of the country's economy has had a positive impact on the demand for office space. Market rentals in the Klang Valley were generally stable and the average occupancy rate improved to 82% by June 2005. The Klang Valley currently has a surplus of 12 million square feet of office space. Strategically located office buildings which are well maintained, have marginally increased their rental rates.

FINANCIAL HIGHLIGHTS

The Group recorded RM15.9 million in profit before taxation compared to RM37.0 million in the previous financial year. Revenue was recorded at RM146.3 million compared to RM199.8 million in the corresponding year (included as part of the RM199.8 million was revenue contribution of RM74.3 million, arising from the disposal of a jointly controlled entity).

During the financial year under review, gross revenue from the Residential Division rose by 9.7% to RM73.5 million mainly due to encouraging sales from 3 KiaPeng, our prestigious service apartment development. The Hotel and Resort Division recorded an 8.4% growth to RM47.8 million in revenue. This was mainly driven by the improvement in the tourism industry. Revenue for our Property Investment Division rose 68.1% to RM23.2 million due to improved occupancy levels and contribution of HP Towers that was acquired from a jointly controlled entity.

In the course of this financial year, we saw a steady improvement in our balance sheet. Net tangible assets increased to RM752.0 million as at 30 June 2005, from RM744.9 million in the previous year.

PROSPECTS

Demand for residential properties is expected to remain stable with positive consumer sentiment, increase in private sector investment, favourable interest rates and attractive financing packages. The sustainable growth in the economy is also expected to improve our office and hotel occupancy rates.

Moving forward, we will undertake various initiatives and plans to improve our performance. By further enhancing our development projects and products, we believe we can deliver good value and contribute to improving the quality of life of our customers.

CORPORATE DEVELOPMENTS

On 5 November 2004, the Company's indirect wholly-owned subsidiary, Prophills Development Sdn. Bhd., completed the acquisition of an office building known as HP Towers (formerly known as Wisma Semantan) from a jointly controlled entity for a cash consideration of RM103,823,400.

On 5 August 2005, the Company announced its intention to dispose HP Towers and Menara HLA ("Proposed Disposals") to a Real Estate Investment Trust ("REIT") to be established by the Company and proposed to be listed on the Main Board of Bursa Malaysia Securities Berhad ("Proposed Listing"). On the same day, submission was made to the Securities Commission for its approval on the said proposals. The Proposed Disposals will allow the Group to realise its investments in HP Towers and Menara HLA. It will also enable the Group to participate in the local real estate investment market through its proposed holdings in the REIT as well as its involvement in the management of the REIT upon completion of the Proposed Disposals

and Proposed Listing. As the REIT grows in size through the acquisitions of yield-accretive properties, it will provide a recurring fee-based revenue to the Group as the manager for the REIT.

DIVIDEND

During the year, the Company paid a final dividend of 2% less tax at 28% amounting to RM5,043,303 in respect of the previous financial year.

The Board is pleased to recommend a final dividend in respect of the financial year ended 30 June 2005 of 2% less tax at 28% amounting to RM5,043,303.

DIRECTORATE

On behalf of the Board, I welcome YBhg Tan Sri Nik Mohamed bin Nik Yaacob as a new Board member with effect from 28 January 2005.

APPRECIATION

On behalf of the Board of Directors, I wish to express our appreciation for the continued support of our valued customers, business associates, government authorities and shareholders and we look forward to their continued support in the future. During the financial year ended 30 June 2005, the Company adopted the Malaysian Accounting Standards Board ("MASB") 32, Property Development Activities for the first time.

laporan tahunan 2005 annual report

www.mystorey.com

2. SIGNIFICANT ACCOUNTING POLICIES (cont'd)

(b) Basis of Consolidation (cont'd)

(i) Subsidiaries (cont'd)

- (i) Under the acquisition method of accounting, the results of subsidiaries acquired or disposed of during the financial year are included from the date of acquisition or up to the date of disposal. At the date of acquisition, the fair values of the subsidiaries' net assets are determined and these values are reflected in the consolidated financial statements. The difference between the acquisition costs and these fair values is included in the consolidated balance sheet as goodwill or reserve on consolidation as appropriate. Goodwill on consolidation is stated at cost less accumulated impairment losses. The policy for the recognition and measurement of impairment losses is in accordance with Note 2(e).
- (ii) Under the merger method of accounting, the results of the subsidiaries are presented as if the companies had been combined throughout the current and previous financial years. The debit difference between the cost of acquisition over the nominal value of the share capital and share premium of the subsidiaries is written off against reserves. Any resulting credit differences, however, are classified as equity and be regarded as a non-distributable reserve.

All inter-company transactions and balances and the resulting unrealised profits are eliminated on consolidation and the consolidated financial statements reflect external transactions only. Unrealised losses resulting from inter-company transactions are also eliminated.

The gain or loss on disposal of a subsidiary is the difference between net disposal proceeds and the Group's share of its net assets together with any exchange differences which were not previously recognised in the consolidated income statement. Minority interest is measured at the minorities' share of the post acquisition fair values of the identifiable assets and liabilities of the acquiree.

(ii) Associated Companies

An associated company is an investee company that is not a subsidiary and in which the Group has a long term equity interest and exercises significant influence over the financial and commercial policies of the investee through Board representation.

Investment in associated company is accounted for in the consolidated financial statements by the equity method of accounting based on the audited or management financial statements of the associated company.

The Group's share of results and reserves of the associated companies acquired or disposed of are included in the consolidated financial statements from the date of acquisition or up to the date of disposal under the equity method.

Unrealised gains on transactions between the Group and its associates are eliminated to the extent of the Group's interests in the associates. Unrealised losses on such transactions are also eliminated to the extent of the Group's interests in the associates.

2. SIGNIFICANT ACCOUNTING POLICIES (cont'd)

(b) Basis of Consolidation (cont'd)

(iii) Jointly Controlled Entities

A jointly controlled entity is an entity in which the Group has joint control over its economic activity established under a contractual arrangement.

Investments in jointly controlled entities are accounted for in the consolidated financial statements by the equity method of accounting based on the audited or management financial statements of the jointly controlled entities.

The Group's share of results of jointly controlled entities included in the consolidated financial statements from the date of formation of the jointly controlled entities and up to the date of completion of the projects under the equity method.

Unrealised gains on transactions between the Group and its jointly controlled entities are eliminated to the extent of the Group's interest in the jointly controlled entities. Unrealised losses are eliminated unless the transaction provides evidence of impairment of the assets transferred.

(c) Property, Plant and Equipment and Depreciation

Property, plant and equipment are stated at cost less accumulated depreciation and impairment losses. The policy for the recognition and measurement of impairment losses is in accordance with Note 2(e).

Freehold land is not depreciated.

Leasehold land and hotel properties are not depreciated as their depreciation and accumulated depreciation are not expected to be material in view of their long economic lives and high residual values.

Depreciation of other property, plant and equipment is provided for on a straight line basis to write off the cost of each asset over the estimated useful life at the following annual rates:

Buildings other than hotel buildings	2%
Building service plant, equipment and furniture and fittings	5% - 20%
Motor vehicles	20%

Upon disposal of an item of property, plant or equipment, the difference between the net disposal proceeds and the net carrying amount is recognised in the income statement.

(d) Investments

The Company's investments in subsidiary and associated companies and jointly controlled entities are stated at cost less impairment losses. The policy for the recognition and measurement of impairment losses is in accordance with Note 2(e).

Short term investments are carried at the lower of cost and market value, determined on an aggregate basis. Cost is determined on the weighted average basis while market value is determined based on quoted market values.

Long term investments other than in subsidiaries and associates are stated at cost. Provision is made when the decline in value of the investments is considered to be other than temporary.

On disposal of such investments, the difference between net disposal proceeds and their carrying amounts is recognised in the income statement.

2. SIGNIFICANT ACCOUNTING POLICIES (cont'd)

(e) Impairment of Assets

At each balance sheet date, the Group reviews the carrying amounts of its assets to determine whether there is any indication of impairment. If any such indication exists, impairment is measured by comparing the carrying values of the assets with their recoverable amounts. Recoverable amount is the higher of net selling price and value in use, which is measured by reference to discounted future cash flows.

An impairment loss is recognised as an expense in the income immediately. Reversal of impairment losses recognised in prior years is recorded when the impairment losses recognised for the asset no longer exist or have decreased.

(f) Foreign Currencies

(i) Transactions in foreign currencies

Transactions in foreign currencies are initially recorded in Ringgit Malaysia at rates of exchange ruling at the time of the transaction. At each balance sheet date, foreign currency assets and liabilities are translated into Ringgit Malaysia at exchange rates ruling at that date. All exchange gains and losses are included in the income statement.

(ii) Translation of foreign currency financial statements

The revenues and expenses of foreign operations are translated into Ringgit Malaysia at average exchange rates applicable throughout the year.

Assets, liabilities and income statement items of foreign subsidiaries are reported in Ringgit Malaysia at the exchange rates ruling at the balance sheet date. All resulting translation differences are included in the foreign exchange reserve in shareholders' equity.

The principal exchange rates used for every unit of foreign currencies ruling at the balance sheet date are as follows:

Foreign currency	2005 RM	2004 RM
United States Dollar	3.80	3.80
Philippine Peso	0.07	0.07
British Sterling Pound	6.86	6.79
Singapore Dollar	2.25	2.21

(g) Investment properties

Investment properties consist of land and buildings held for investment and rental.

Investment properties are treated as long term investments and are stated at cost less impairment losses. The policy for the recognition and measurement of impairment losses is in accordance with Note 2(e).

Upon disposal of an investment property, the difference between the net disposal proceeds and the carrying amount is recognised in the income statement.

2. SIGNIFICANT ACCOUNTING POLICIES (cont'd)

(h) Land Held for Property Development and Property Development Costs

(i) Land held for property development

Land held for property development consist of land where no development activities have been carried out or where development activities are not expected to be completed within the normal operating cycle. Such land is classified within non-current assets and is stated at cost less any accumulated impairment losses. The policy for the recognition and measurement of impairment losses is in accordance with note 2(e).

Land held for property development is reclassified as property development costs at the point when development activities have commenced and where it can be demonstrated that the development activities can be completed within the normal operating cycle.

(ii) Property development costs

Property development costs comprise all costs that are directly attributable to development activities or that can be allocated on a reasonable basis to such activities.

When the financial outcome of a development activity can be reliably estimated, property development revenue and expenses are recognised in the income statement by using the stage of completion method. The stage of completion is determined by the proportion that property development costs incurred for work performed to date bear to the estimated total property development costs.

When the financial outcome of a development activity cannot be reliably estimated, property development revenue is recognised only to the extent of property development costs incurred that is probable will be recoverable, and property development costs on properties sold are recognised as an expense in the period in which they are incurred.

Any expected loss on a development project, including costs to be incurred over the defects liability period, is recognised as an expense immediately.

Property development costs not recognised as an expense are recognised as an asset, which is measured at the lower of cost and net realisable value.

The excess of revenue recognised in the income statement over billings to purchasers is classified as accrued billings within trade receivables and the excess of billings to purchasers over revenue recognised in the income statement is classified as progress billings within trade payables.

(i) Construction Contracts

Where the outcome of a construction contract can be estimated reliably, contract revenue and contract costs are recognised as revenue and expenses respectively by reference to the stage of completion of the contract activity. The stage of completion is measured by reference to the proportion of contract costs incurred for work performed to date bear to the estimated total contract costs.

Where the outcome of a construction contract cannot be estimated reliably, contract revenue is recognised to the extent of contract costs incurred that is probable will be recoverable. Contract costs are recognised as expenses in the period in which they are incurred.

When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognised as an expense immediately.

When the total of costs incurred on construction contracts plus, recognised profits (less recognised losses), exceeds progress billings, the balance is shown as amount due from customers on contracts. When progress billings exceed costs incurred plus, recognised profits (less recognised losses), the balance is shown as amount due to customers on contracts.

2. SIGNIFICANT ACCOUNTING POLICIES (cont'd)

(j) Inventories

(i) Property inventories

Property inventories consist of residential and commercial properties. They are stated at the lower of cost and net realisable value. Cost includes the relevant cost of land, development expenditure and related interest cost incurred during the development period.

(ii) Others

Inventories are stated at the lower of cost and net realisable value. Cost is determined on the weighted average basis.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

(k) Cash and Cash Equivalents

For the purpose of the cash flow statement, cash and cash equivalents consist of cash in hand, demand deposits and short term, highly liquid investments readily convertible to known amounts of cash and subject to insignificant risk of changes in value, against which the bank overdraft balances, if any, are deducted.

(l) Provisions for Liabilities

Provisions for liabilities are recognised when the Group has a present obligation as a result of a past event, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount can be made. Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate. Where the effect of the time value of money is material, the amount of a provision is the present value of the expenditure expected to be required to settle the obligation.

(m) Income Tax

Income tax on the profit or loss for the year comprises current and deferred tax. Current tax is the expected amount of income taxes payable in respect of the taxable profit for the year and is measured using the tax rates that have been enacted at the balance sheet date.

Deferred tax is provided for, using the liability method, on temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts in the financial statements. In principle, deferred tax liabilities are recognised for all taxable temporary differences and deferred tax assets are recognised for all deductible temporary differences, unused tax losses and unused tax credits to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, unused tax losses and unused tax credits can be utilised. Deferred tax is not recognised if the temporary difference arises from goodwill or negative goodwill or from the initial recognition of an asset or liability in a transaction which is not a business combination and at the time of the transaction, affects neither accounting profit nor taxable profit.

Deferred tax is measured at the tax rates that are expected to apply in the period when the asset is realised or the liability is settled, based on tax rates that have been enacted or substantively enacted at the balance sheet date. Deferred tax is recognised in the income statement, except when it arises from a transaction which is recognised directly in equity, in which case the deferred tax is also charged or credited directly in equity, or when it arises from a business combination that is an acquisition, in which case the deferred tax is included in the resulting goodwill or negative goodwill.

2. SIGNIFICANT ACCOUNTING POLICIES (cont'd)

(n) Employees Benefits

(i) Short term benefits

Wages, salaries, bonuses, annual and sick leave and social security contributions are recognised as an expense in the year in which the associated services are rendered by employees of the Group.

(ii) Defined contribution plans

Contributions to defined contribution plans are recognised as an expense in the income statement as incurred.

(iii) Equity compensation benefit

The Company Executive Share Option Scheme ("ESOS") allows the Group's employees to acquire ordinary shares of the Company. No compensation cost or obligation is recognised. When the options are exercised, the equity is increased by the amount of the proceeds received.

(o) Revenue Recognition

Revenue is recognised when it is probable that the economic benefits associated with the transaction will flow to the enterprise and the amount of the revenue can be measured reliably.

(i) Construction contracts

Revenue from construction contracts is accounted for by the stage of completion method as described in Note 2(i).

(ii) Development properties

Revenue from sale of development properties is accounted for by the stage of completion method as described in note 2(h).

(iii) Property inventories

Revenue from sale of property inventories is recognised when the significant risks and rewards of ownership of the property have been passed to the buyer.

(iv) Dividend income

Dividend income arising from investments in subsidiaries, jointly controlled entities, associated company, long term investments and short term investments are recognised when the rights to receive payment are established.

(v) Rental income

Revenue from room rental and rental of properties are recognised on the accrual basis unless collectibility is in doubt, in which case, they are recognised on receipt basis.

(vi) Interest income

Interest income are recognised on the accrual basis unless the collectibility is in doubt, in which case they are recognised on receipt basis.

2. SIGNIFICANT ACCOUNTING POLICIES (cont'd)

(p) Financial Instruments

Financial instruments are recognised in the balance sheets when the Group has become a party to the contractual provisions of the instrument.

Financial instruments are classified as liabilities or equity in accordance with the substance of the contractual arrangement. Interest, dividends, gains and losses relating to a financial instrument classified as a liability, are reported as expense or income. Distributions to holders of financial instruments classified as equity are charged directly to equity. Financial instruments are offset when the Group has a legally enforceable right to offset and intends to settle either on a net basis or to realise the asset and settle the liability simultaneously.

(i) Short Term Investments

Short term investments are carried at the lower of cost and market value, determined on an aggregate basis. Cost is determined on the weighted average basis while market value is determined based on quoted market values. Increases or decreases in the carrying amount of marketable securities are recognised in the income statement. On disposal of marketable securities, the difference between net disposal proceeds and the carrying amount is recognised in the income statement.

(ii) Receivables

Receivables are carried at anticipated realisable values. An estimation for doubtful debts is made when collection of the full amount is no longer probable. Bad debts are written off when identified.

(iii) Payables

Payables are stated at cost which is the fair value of the consideration to be paid in the future for goods and services received.

(iv) Interest-Bearing Borrowings

Interest-bearing bank loans and overdrafts are recorded at the amount of proceeds received, net of transaction costs.

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are capitalised as part of the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. For borrowings made specifically for the purpose of acquiring a qualifying asset, the amount of borrowing costs eligible for capitalisation is the actual borrowing costs incurred on that borrowing during the period less any investment income on the temporary investment of funds drawn down from that borrowing facility.

All other borrowing costs are recognised as an expense in the income statement in the period in which they are incurred.

(v) Equity Instruments

Ordinary shares are classified as equity. Dividends on ordinary shares are recognised in equity in the period in which they are declared.

The transaction costs of an equity transaction are accounted for as a deduction from equity, net of tax. Equity transaction costs comprise only those incremental external costs directly attributable to the equity transaction which would otherwise have been avoided.

(g) Fair Values

The carrying amounts of the financial assets and liabilities of the Group as at 30 June 2005 approximate their fair values except as set out below:

	GROUP/COMPANY	
	Carrying Total RM'000	Fair value RM'000
Financial Liabilities		
Term Loans	32,500	31,675

The following methods and assumptions are used to estimate the fair values of the following classes of financial instruments:

(i) Cash and Cash Equivalents, Trade and Other Receivables/Payables and Short Term Borrowings

The carrying amounts approximate fair values due to the relatively short term maturity of the financial instruments.

(ii) Quoted share investments

The fair value of quoted shares is determined by reference to stock exchange quoted market bid prices at the close of the business on the balance sheet date.

(iii) Due from/to Jointly Controlled Entities, Related Parties and Subsidiaries

It is not practical to estimate the fair values of amounts due from/to jointly controlled entities, related parties and subsidiaries due to no fixed repayment terms entered into between the parties.

The nominal/notional amounts and net fair value of financial instruments not recognised in the balance sheets of the Group and of the Company as at the end of the financial year are:

	Group	
	Nominal/ Notional Amount RM'000	Fair Value RM'000
